NoteLinqAppAPI

Schemas

AccessTokenDto >

ClassificationDto >

Colors > integer(\$int32)
const color for note as classification
Possible values:

- 0-white: default,white: #fff
- 1-lightCyan: lightCyan: #
- 2-lightPink: lightPink: #
- 3-lightYellow: lightYellow: #

Enum:
> Array [4]

LoginDto > {
 userName* > [...]
 password* > [...]
 rememberMe > [...]
}

NoteDto > {
 id > [...]
 title* > [...]
 body > [...]
 classificationId > [...]
}

5. Copy your Baseurl

6. Test login by `check seed data - Infrastructure`

```
request:{
  "userName": "user",
  "password": "user",
  "rememberMe": true
}
```

```
res:{
  "name": "NorLinq User",
  "userName": "user",
  "email": "user@norling.com.",
  "accessToken": "eyJhbGciOiJo....."
}
```

7. enjoy 😊.

FrontEnd

Vue 3

1. Exec Commands

1. Go to project path `Application/Presentation/NoteLinqApp` , use `cmd` or default cmd
2. insure that up to date node.js installed 9. / vue cli not required / vite

```
npm i
```

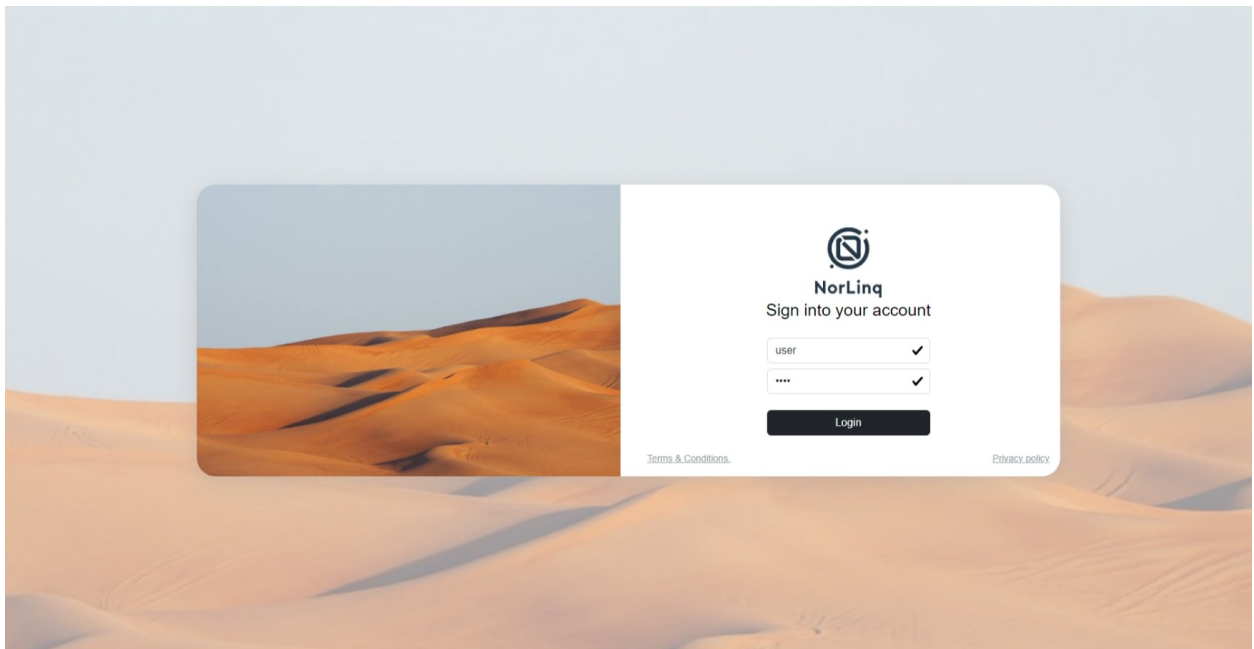

2. Build And Run

```
npm run dev
```

3. replace Baseurl `NoteLinqApp\src\core\appsettings.ts` to your port

```
export const baseUrl = "https://localhost:7012/api/"; //<--  
  
export const....
```

4. check the pages and login

5. there no alert or toaster , simple ui with handle some validation facing any error will run or build check dev tool and cmd

Book Recommendation

Just finished reading "The Power of Habit" by Charles Duhigg. Highly recommend it for insights into habits, their formation, and how they can be transformed. Takeaways include the habit loop and the importance of keystone habits.
